KEY MOMENTS

WORK EXPERIENCE

Jan 2016 - Present

Boston, USA

Sr. Data Scientist - Charles River Laboratoires

- Rodent Social Behavior AI Engine:** CNN, Transfer Learning, Keras, OpenCV, DSVM
Built state of the art deep learning solution to understand animal behaviors and tracking in real-time. Processed over 18+ hours of video footage with 97% accuracy.
- Salesforce Opportunity Scoring:** Apache Spark, Azure Data Factory, AML, Power BI
Improved sales teams' efficiency in achieving their quota by 20% focusing on most promising opportunities using Opportunity Scoring ML Model.
- Customer360:** Azure Data Factory, Apache Spark, Power BI, Azure DevOps
Integrated over 100K+ siloed customer's data from 8+ sources and provided end-to-end customer journey to executives, sales teams & relationship managers through interactive Power BI dashboard and enabled customer experience simpler, smarter and personalized.
- Revenue & Rodent demand forecasting:** Time-series forecasting, Regression, RNN, R
Reduced the production cost by 5M for fiscal years 2017 & 2018 and saved ~45K animals every year from being discarded.
- Digital Pathology:** CNN, PyTorch, OpenCV, DSVM
Shifted the paradigm of imaging data analysis from labor-intensive manual image segmentation tasks to a AI-based analysis. Estimated \$10-20M/yr for a "early read" and \$2M/yr of improved utilization of pathologists.

Nov 2011 - Aug 2014

Bangalore, INDIA

Data Engineer/Analyst - Tata Consultancy Services

- Enterprise Data Warehouse Hadoop:** Informatica, HDFS, Sqoop, Pig, SQL Server, SSRS, R
Redesigned and developed an inhouse Hadoop data warehouse, built ETL Pipelines to migrate 200+ GB of history data from 6 source systems to the Hadoop data warehouse. Enabled data integration faster and flexible and provided high-value reporting.
- Log Management/ Analytic tool:** Python, Shell Script, Spark, HDFS
Developed an enterprise solution to analyze Apache Tomcat / Catalina logs of ~ 50 Linux servers to reveal errors (memory leaks, dblocks) and prevent problems which affect the application server performance.

CERTIFICATIONS

- Udacity - Deep Learning with PyTorch Mar 2019
- Udacity - Deep Learning Nanodegree Foundation Feb 2018
- edX - Scalable Machine Learning with Apache Spark Aug 2017

ABOUT ME

6 years experienced Data Scientist/ Engineer with thorough hands-on experience in developing Machine Learning, AI applications from concept to completion. Passionate about turning ideas into reality.

SKILLS

Programming

R, Python, Java, SQL, Shell Script

Machine Learning/ Deep Learning frameworks

Scikit-learn, Caret, H2O, MLlib, PyTorch, Keras, TensorFlow, OpenCV

Machine Learning/ Deep Learning Techniques

Descriptive/Inferential statistics, Feature selection, Dimensionality Reduction, Ensemble, Optimization, CNN, Transfer Learning, RNN, LSTM

Visualization

PowerBI, Tableau, ggplot2, matplotlib, bokeh, Seaborn, Apache Superset

Data Integration

Azure Data Factory/Data Flow, Azure Databricks, Talend, SSIS

Distributed Computing

Apache Spark, Apache Hadoop

Cloud Computing

Microsoft Azure, AWS, Google Cloud Platform

Tools & Systems

Azure DevOps, Docker, Kubernetes, Git, Eggplant

AWARDS & RECOGNITIONS

- Placed 2nd in New England Machine Learning Accessibility Hackathon hosted by **Microsoft**.
- Placed 2nd in Digital Health Deep Learning Challenge hosted by **Pfizer**.
- Placed 1st in Azure Cloud Hackathon hosted by **Microsoft**.
